Initial Definitions

SEARCH TERM - a string of text to be found within the Text or Claims of desired patents.

Search Terms can be classified as either "Action" or "Object."

Several related Action Search Terms may be combined to reflect a single Action.

CELL - a cross section of Search Terms (Action x Object).

Cells are given a reference code (e.g. A01) to depict the combination of source Search Terms.

The reference code may be followed by a C or T to note that the search terms were found within the Text or Claims of the included patents.

CLUSTER - a group of naturally related cells.

FIELD - a patent landscape defined by the composite of all cells.

CELL - a cross section of Search Terms (Action x Object).

Cells are given a reference code (e.g. A01) to depict the combination of source Search Terms.

The reference code may be followed by a C or T to note that the search terms were found within the Text or Claims of the included patents.

CLUSTER - a group of naturally related cells.

FIELD - a patent landscape defined by the composite of all cells.
